

KARTHICK RAJA

UI & GRAPHIC DESIGNER

PROFILE INFO

UX designers, on the other hand, are responsible for the overall user experience of a website or app. They conduct research and user testing to create intuitive, user-friendly interfaces that enhance the overall experience for the user. As a UI/UX designer, my job involves understanding the needs of both the business and the user and finding a balance between the two. I work closely with the development team to ensure that the designs are implemented correctly and meet the technical requirements. My work requires a combination of creativity, technical skills, and attention to detail. Every project comes with its own set of challenges, and it is my responsibility to find creative solutions. I am constantly learning and up skilling to stay updated with the latest design trends and technologies.
